

# Sprint 4 - Burndown Chart

## Overview

Sprint 4 has come to a successful close. The team maintained steady progress and completed all planned tasks on time. Below are the details of the work accomplished in different categories.

## Tasks Done

## User Feed

- Subtask FB-153: Implemented the ability for FitBook users to view workout posts of others they are following on their feed.

## UI Refactoring

- Task FB-151: Completed major refactoring of the user interface to improve usability and aesthetics.

## Homepage Feed (Epic FB-106)

- Story FB-8: Worked on Fitness Progression features to enhance user interaction with their workout progression.

- Story FB-11: Developed the User Feed to allow users to see updates and posts from their connections.
- Story FB-25: Built the Friends Screen to allow users to manage and view friends within FitBook.

## **Posts Support in Backend**

- Task FB-133: Established support for posts in the backend, ensuring a robust and responsive front-end experience.

## **FitBook Posts (Story FB-21)**

- Enhanced the user's ability to create, manage, and interact with posts within FitBook.

## **User Profile (Epic FB-96)**

- Story FB-138: Created FitBook Settings allowing users to manage their profile settings and preferences.

## **Progress**

- The team successfully met all sprint goals, completing work on time.
- Collaboration was effective, and the team adapted well to any changes and challenges.
- Continuous integration and regular code reviews ensured quality deliverables.
